

Career & Self Development: Introduction To The Internet

Program Overview

The Introduction to the Internet course will familiarize students with general Internet concepts and technology. The course is intended to teach students how to use and customize a Web browser. Students are given an orientation to common procedures they can use to maximize successful use of the Internet and all its features. The course is based on Microsoft Internet Explorer 7.0.

During the course, students learn how to use and customize the Internet Explorer browser and investigate the various components of the Internet including the World Wide Web, Electronic Mail, Newsgroups, Mailing Lists, Discussion Groups and IRC/Chat. In addition to learning how to search for information, students are shown how to download useful and interesting Web content and learn about safety, security, and shopping on the Web. Students create a basic web page, and set up and use a free email service on the Web. Students are also taken to exciting sites where they can experience and explore the latest Internet multimedia, including audio and video streaming and animation.

Learning objectives for each lesson are accomplished through a combination of theory and conceptual application within exercises. Students are given ample opportunity to practice, apply, and develop their Internet skills through review questions and practical exercises. Multimedia content is incorporated in this course to introduce, discuss, and enhance the learning experience.
